Objective

Enthusiastic Computer Science student with a strong foundation in full-stack development and curious to grow my interest in AI/ML, seeking opportunities to learn, apply, and contribute to impactful projects.

Education

- RV Institute of Technology and Management, Bengaluru** 2025
Computer Science and Engineering CGPA: 9 (2nd year)
- Visveswaraya Pu college, Newbridge road, Bhadravathi, Shimoga** 2023
Karnataka School Examination and Assessment Board, Bengaluru Percentage: 94
- Government Urdu High School Donabaghatta, Bhadravathi, Shimoga** 2021
Karnataka Secondary Education Examination Board Percentage: 89.6

Projects

- AI Health Guidance System (SymptoCare) | MERN Stack, Node.js Logic**
*A **MERN stack** web application integrating a custom **Rule-Based AI Logic** to interpret layman symptom descriptions and provide reliable, validated health guidance. Developed a **Medication Reminder** feature to demonstrate full-stack persistence and deep-dived into HealthTech safety protocols.*
- Online Stock Trading Platform**
Developed a full-stack web application enabling users to view market trends, manage portfolios, and execute simulated trades using React, Node.js, Express, and MongoDB. Implemented secure authentication and real-time data updates with REST APIs.
- Rental Booking Platform**
Built a responsive web application inspired by Airbnb, allowing users to browse, book, and list rental properties. Implemented authentication, property filters, and CRUD operations with React, Node.js, Express, and MongoDB.
- CipherVault: Secure Systems Journal (MERN + C)**
Engineered a secure, full-stack application demonstrating C/Unix systems integration; utilized IPC (`child_process.spawn`) to delegate encrypted file handling to a C executable that enforces `fcntl` concurrency control against race conditions.

Experience

- AI Development Intern | Capable AI Research Team (2-Month Internship, Ongoing)**
Working on an AI-powered Healthcare Monitoring Agent focusing on model design, decision logic, and API integration. Collaborating with a team to develop intelligent health analysis and automation features.

Technical Skills

Languages: Java, C, HTML, CSS, JavaScript, python

Developer Tools: VS Code, GitHub, Postman, Node.js, Eclipse

Frameworks: React, Express, FastAPI

Cloud/Databases: MongoDB, MySQL

Soft Skills: Teamwork, Problem-Solving, Adaptability, Communication

Coursework: Data Structures and Algorithms, Agentic AI, Computer Networks, Web Development

Areas of Interest: Full-Stack Development, Artificial Intelligence, Machine Learning

Achievements

- Completed Java (DSA) and Web Development courses from Apna College. Built full-stack projects and consistently practiced problem-solving on LeetCode to strengthen coding skills. And Team Head in Academic Technical Projects
